

# Ship Registry Management System

All in one solution for the Classification Society

## S.R.M.S. v.2.0

*Automated error-proof environment – Saving time and money – Provide your customers with extraordinary services and your employees with a powerful tool for increased performance and absolute control.*

- **S.R.M.S.** manages intelligently all records and procedures via a fully customizable automated system. Vessels, companies, contacts, certificates, surveys etc. are all managed and linked through powerful software.
- The system adapts to your exact needs and processes for an easy and quick transition. All existing information (that you currently have) can be transferred easily to the new system allowing a quick Return on your Investment.
- Certificate management and issuing are easier than ever since the system guides all engaged departments / personnel via an intelligent “workflow engine” to a quick and foolproof fulfillment. Process status can be monitored at any time by Company / Department Management.
- You can't miss a deadline with our integrated Scheduler / Calendar tool. The scheduler reminds your users of all the upcoming / pending action items or any other “need to know dates” like Certificate / Survey deadlines, public holiday or any other date specific action.
- Ability to design and implement any automated report required.
- Short implementation time.
- Easy to operate (basic PC literacy is required by users) - Accessible 24 x7 via a web browser (e.g. Internet Explorer) allowing remote operation.
- Secure – Providing powerful administrative tools in order to control access rights (e.g. financial data) per each user.
- And finally **S.R.M.S.** can be further customized to fit your company's exclusive requirements.
